In 1981, Jim Pestoor founded Corners Limited by fabricating custom enclosures for the bird enthusiast. Throughout the years, we have expanded into many different applications, meeting the needs of nature centers, wildlife rehab centers, zoos, and universities. We would not be who we are today without our customers, to whom we are very grateful. As we look with anticipation to the future fabrication of many more enclosures, we hope that these pages show a sample of the projects we have done and give us an opportunity to work with you in the future.
